My name is Dr. Matthew Buckley, and I am a doctor of chiropractic who utilizes various forms of alternative medicine to treat primarily chronic illness and chronic pain conditions. I have been practicing for a little over 2 years and have been utilizing NMT as taught by Dr. Leslie Feinberg since Oct. 2004. Since the training I have utilized NMT successfully in eliminating minor and major allergies, and chronic pain conditions in patients that have been unresponsive to all other forms of treatment. The NMT system has been advertised to be effective in enhancing the health status of patients, as well as being an effective tool in eliminating pain and chronic conditions. As taught in the NMT manual, the technique works as disclosed. I can attest that numerous patients are benefiting from this technique, and many more will again in the future.

As an example of success, I have treated an 8 year old girl who had a major peanut allergy that would cause extreme discomfort to have a residue of the oil on her skin. Following one ½ hour treatment the allergy no longer produced that reaction and she has been able to tolerate oral ingestion without any sign of reaction.

Another example, being a patient with a gluten allergy that would have extreme gut discomfort and fatigue with consumption of the protein who became non reactive following one ½ hour treatment.

Personally, I can now eat wheat without it producing pain and fatigue after one treatment.

This may all sound too unbelievable, but I attest that these claims are indeed factual, and are indeed consistently reproducible based on the NMT technique as taught by Dr. Leslie Feinberg.

Sincerely,

Matthew Buckley DC
